ALL IN ONE BY GRIFFWERK

TRULY MINIMALIST | COMPLETELY ROSELESS

A NEW ERA

In the past, door furniture has consisted of modular product ranges, comprising handles, roses, restroom locks, lever keys, etc. GRIFFWERK has radically simplified this complex system of components to develop the "All in One". All of the handle, latch and lock functions are now incorporated into one single element. Roses are no longer necessary.

We actually unveiled our first roseless handle in 2008. FRAME set the trend for the industry, creating a clear new standard. Shortly afterwards, we introduced the first integrated locking system for FRAME, an innovation that we have since expanded with smart2lock by GRIFFWERK to create a comprehensive family of products. Two additional roseless door handles followed, in AVUS ONE and R8 ONE. The new design lines maintain the minimalist standards set by FRAME and are available in four premium finishes. All in One is a clear statement: roses are superfluous. A new era of door fitting mechanisms has begun.

Matthias Lamparter
Griffwerk GmbH Managing Director

DESIGN STUDIO

ALL IN ONE

ONE is all about maximum reduction, getting down to the bare essentials for this design line. Roses have been dispensed with. All of the fitting's functions have been squeezed into one package. The handle now emerges from the door as a singular form thanks to our new system, which is nevertheless compatible with all doors with standard locks. One handle design for the most discerning demands. In three different versions.

smart2lock
by GRIFFWERK

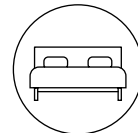

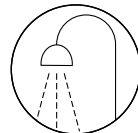

Smart2lock is GRIFFWERK's own locking system for interior doors. The door is locked and unlocked by a simple slider integrated into the handle, located within easy reach for the thumb. This means that doors can be locked and unlocked with one hand.

Roseless handles can be fitted to all types of door and are compatible with standard locks.

PRIVACY IS JUST A CLICK AWAY WITH SMART2LOCK BY GRIFFWERK
As well as being ideal for bathroom and toilet doors, it helps create private spaces in bedrooms, home offices, children's playrooms and guest rooms, as well as dens and loft spaces.

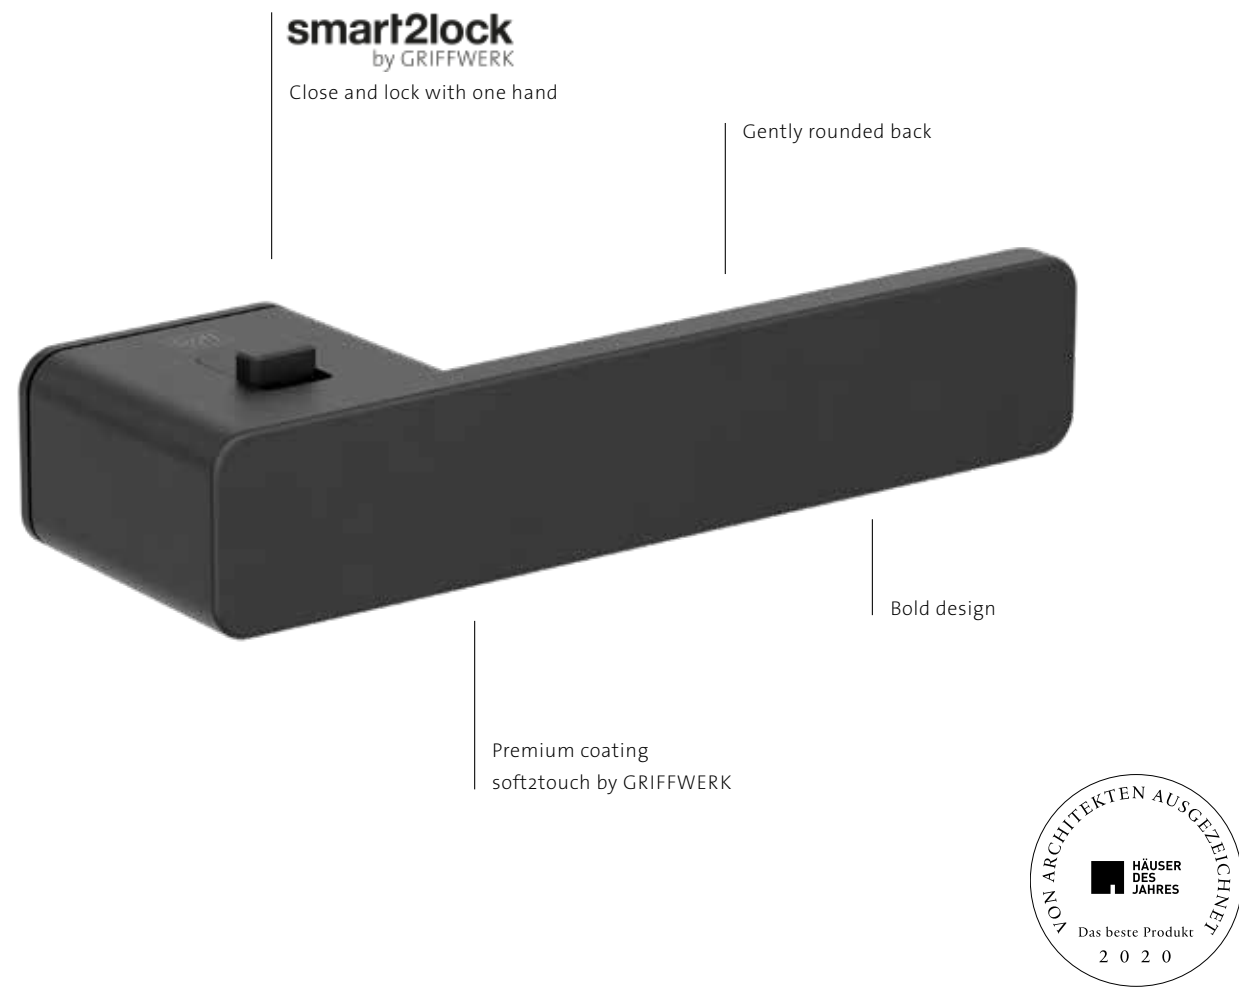

A NEW AESTHETIC FOR DOORS WITHOUT ROSES.

The handles in the product line ONE by GRIFFWERK sit flush with the door leaf, creating a new pared-down look for doors. Lock roses such as those commonly used to mount bathroom privacy locks and key holes are no longer needed. The lock mechanism has been integrated directly into the handle with smart2lock by GRIFFWERK.

A statement of clarity on full-height doors.

R8 ONE

R8 ONE is available in four colours with the premium soft2touch by GRIFFWERK coating. It is particularly pleasing to the touch. The Velvet Grey colour looks just like stainless steel, but with a much softer feel. Nevertheless, fittings in Velvet Grey combine well with real stainless steel or other elements in a stainless-steel look. Cashmere Grey has a warm, luxuriously soft tone that blends perfectly with wooden doors. And for a striking contrast, Graphite Black is just the right choice.

AVUS ONE

AVUS takes its name from the Berlin race track of legend. The track featured two large radius curves, which we reduced to basic geometric shapes in the body of the handle. Two semi-circular ends now bracket the handle's front outline. Like our other handles, AVUS ONE is available in four colours.

DESIGN STUDIO

FRAME

True to the original principles, the handle sits alone, mounted flush to the door and housing the entire mechanism. A patented system developed by GRIFFWERK allows designers to dispense with roses entirely. FRAME can also be supplied with an integrated locking mechanism. And a minimalist solution for glass doors is also available in the same design concept. Inlays can be matched to the surface of the door. White and black glass inserts can be ordered through GRIFFWERK.

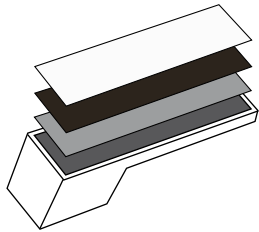

Design:
Professor Thomas Gerlach

From 1983 to 1992, Thomas Gerlach spent his early career as Head of Design, Managing Director and European President of frog design. Work for Apple, Louis Vuitton, Samsung, Sony and many other leading international companies won frog design world renown. Thomas Gerlach is now Academic Dean at Pforzheim University in Germany. In 2007 he designed the FRAME fittings concept for GRIFFWERK DESIGN STUDIO.

An ode to the right angle:
lean and consistently pared down

Velvet grey Graphite black Cashmere grey Silk white

AVUS ONE

Velvet grey Graphite black Cashmere grey Gold matt

Order with smart2lock by GRIFFWERK or non-locking

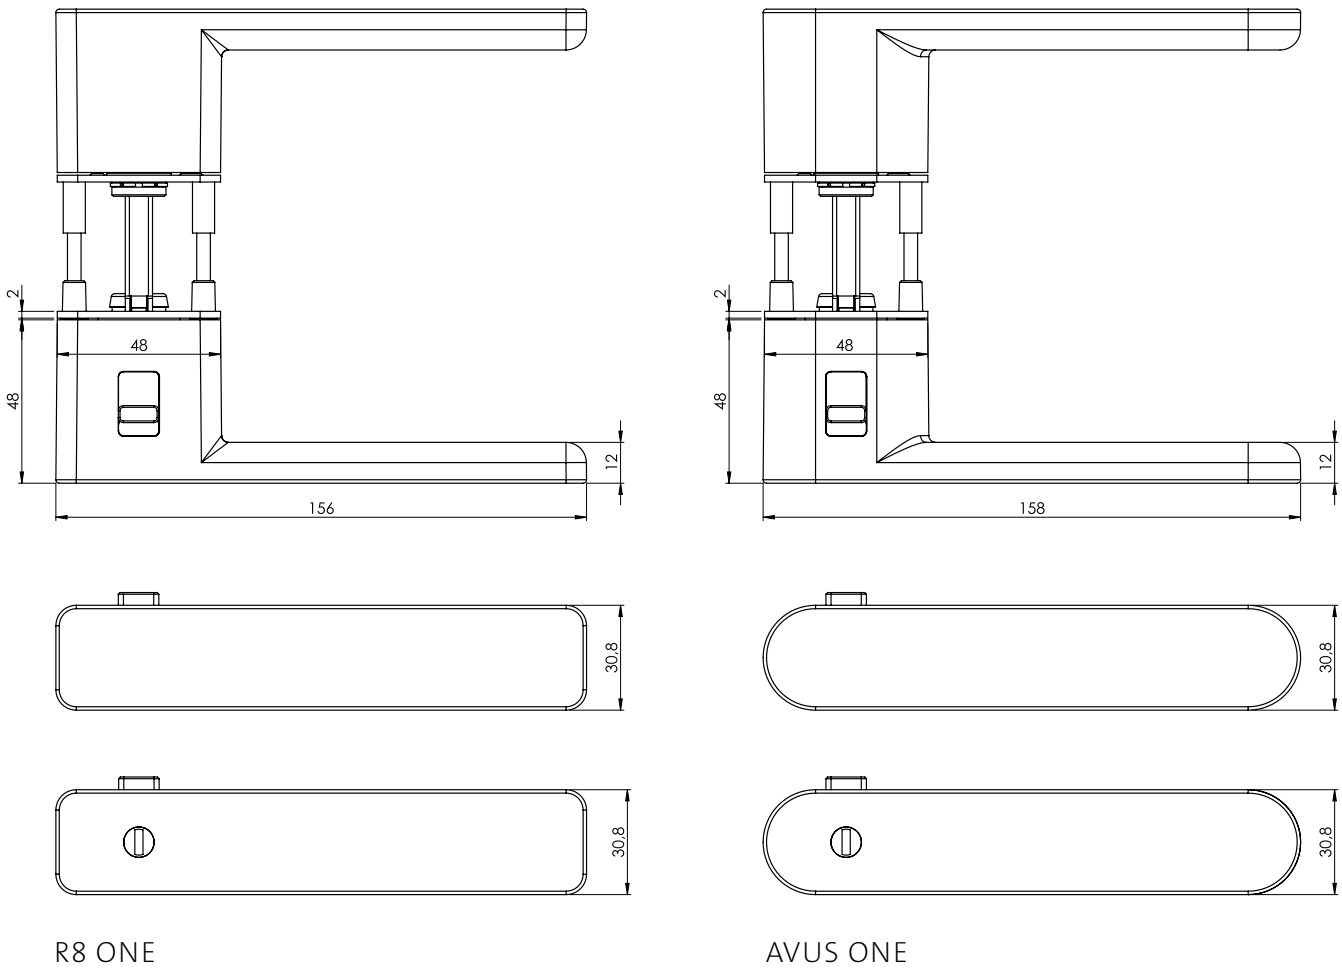

EMERGENCY UNLOCK
The locked handle cannot be depressed, but can be unlocked from the outside in an emergency.

ADJUSTABLE LEVER ANGLE
Small adjustments can be made to the angle of the door handle.

DIMENSIONS

ALL IN ONE SYSTEM

DO I NEED BATHROOM PRIVACY LOCKS?
All fittings that come with smart2lock by GRIFFWERK can be mounted with conventional door locks; no additional bathroom privacy locks need to be installed.

WHAT FITTINGS ARE SUITABLE FOR APARTMENT ENTRY DOORS?
We recommend combining our handles with a standard door fitting. The AVUS handle (rose fitting, from sieger design) is an excellent match for AVUS ONE; the MINIMAL MODERN handle (rose fitting, from sieger design) matches R8 ONE.

WHAT ABOUT WINDOWS?
GRIFFWERK stocks window handles in the premium softztouch by GRIFFWERK colours. The matching design lines are AVUS (for AVUS ONE) and MINIMAL MODERN (for R8 ONE).

ARE MATCHING HINGES AVAILABLE?
Yes, the Velvet Grey colour is a good match for stainless steel and elements with a stainless-steel look. Griffwerk also offers matching hinges in Graphite Black and Cashmere Grey.

Also available:
concealed hinges
in Velvet Grey
Graphite Black
and Cashmere Grey
